

DEMO HALL: TEST YOUR PRODUCTS

RUNNING OF FREE TRIALS ON YOUR PRODUCTS BEFORE SELLING

All the instruments produced by Gibitre perform tests in compliance with international standards and are rigorously produced and calibrated in accordance with the standard requirements.

Gibitre has equipped a complete demonstration hall with the complete series of the instrument produced, which is dedicated to the perfor-

mance of testing on product supplied by the customers.

The free test service of your materials allows our customers to verify the full compliance of the results obtained with the expectations and to evaluate specific measurement and calculation needs before supply.

The tests are carried out in the fully equipped Gibitre demonstration room and can be carried out:

- **in the presence of a customer's technicians**
- **in remote connection / streaming with the customer**
- **without the presence of the customer**

The results of the tests carried out are documented through test reports or videos.
